Codable Technologies Pvt Ltd — Frontend Developer

Lucknow, Uttar Pradesh

Jan 2019 - Oct 2020

PROJECTS

Feather (React.Js | Tailwind | Redux | NodeJs | MongoDB | Next.JS)

- A application to provide furniture in a subscription based manner to the users that relocate frequently.
- Developed monthly subscription service for your home appliances that lets you easily get the furniture (decor!) you need, for the amount of time you need it.
- Generated **\$1 million** in new business revenue within the first year by developing and executing a successful sales outreach program.
- Implemented **Infinite scroll** and **lazy loading** with **suspense**
- Link: <https://livefeather.com/>

FatLlama (React.Js | Tailwind | Redux | Responsive Web Design | SEO | Next.JS)

- A platform enabling locals to rent diverse items for home tasks, recreation, or professional needs, fostering community connections.
- Developed an application enabling rentals; increased user engagement by **25%**
- Implemented **state management** using **redux** and optimise the **RESTful APIs** using React query.
- API calls reduced up to **25%** after optimization also improved User Experience.
- Link: <https://livefeather.com/>

MYORX (React.Js | Bootstrap | Typescript | RESTful APIs | RTK Query)

- Difficulty in efficiently managing health care consultations and medication delivery through a streamlined process.
- Developed an admin panel with a questionnaire for consultations, integrating a system for doctor review and medication delivery.
- Improved consultation efficiency, achieving a **30%** reduction in processing time and a**25%** increase in customer satisfaction.
- Implemented **Lazy Loading** , **debouncing** to **Optimize** application .

Zonvoir (React.Js | Bootstrap | Responsive Web Design | SEO | Next.JS)

- A portfolio website is a personalized showcase of one's work, skills.
- Achieved a **30%** increase in website traffic through the implementation of a comprehensive **SEO strategy**
- Link: <https://zonvoir.com/>

Funnel Builder (React.Js | Bootstrap | RESTful APIs)

- To boost the sale and average order value through order bumps and one-click upsells..
- Developed a Flow chart based React application that integrated with wordpress as a plugin.

MasonOne (React.Js | Bootstrap | Mobile Responsive Design | SEO | Nodejs | MongoDB | Next.JS)

- Lack of a comprehensive platform for city-specific services like business listings, real estate, jobs, and local information.
- Developed an application integrating business, real estate, job, and information listings specific to the city.
- Increased user engagement by **30%** providing seamless access to city services, boosting local business visibility, and enhancing community interaction.
- User Panel: <https://masonone.us/>
- Optimised the **RESTful APIs** using react-query and optimise the code to improve performance
- Admin Panel: <https://admin.masonone.us/>
